# Upgrade to Portrait Hinges and Elevate Your Shower Design

Designed and tested in Melbourne, Australia, Portrait hinges set a new standard in shower hardware. Featuring a sleek, modern profile, they are 30% thinner and 28% stronger than traditional wide hinges. With premium solid brass construction and a weight rating of 45kg per pair, larger, more seamless glass doors are now possible without the need for a third hinge. A cleaner, more sophisticated look with fewer visual obstructions.
